

# Kyocera Classic Universaldriver

## Software Information

Version 1.0

08.10.2012

KYOCERA Document Solutions Inc.

KYOCERA Corporation

THE NEW VALUE FRONTIER

### Abstract

Kyocera Classic Universaldriver supports multiple kinds of Kyocera MFPs and Printers with one driver. Therefore if user installs the Kyocera Classic Universaldriver, he or she doesn't need to install device specific drivers and he or she can use the Kyocera devices on network.

- Kyocera Classic Universaldriver is not included in the CD which is bundled to the MFP/Printer. It's provided via each sales companies' Web page.
- Kyocera Classic Universaldriver supports Windows XP, Vista, Windows 7, Server 2003, and Server 2008 (R2).

### Benefit

- For administrator (1) : Reduce managing cost

IT management division can reduce control/management cost relating to management/support cost of MFP and printer by making all users use Kyocera Classic Universaldriver. Since Kyocera Classic Universaldriver supports almost all Kyocera MFPs and printers, if new device is added to the office, there is no need to install the driver. As users can easily add printing device to their computer system, inquiries from users will be decreased and IT division can reduce management cost and time.

- For administrator (2) : Small footprint

The Kyocera Classic Universaldriver is based on Microsofts' rendering engine 'unidrv' or 'pscript'.

- For users (1) : improved convenience when move to multiple locations

When customers go to particular office, they can use the printers on the office without installing the printer driver for the device.

- For users (2) : latest common interface is provided

Users who are using old models have to use the old driver which has old user interface. With Kyocera Classic Universaldriver, users can use new interface of Kyocera Classic Universaldriver and they can use all functions of Kyocera Classic Universaldriver.

### Features

- Kyocera Classic Universaldriver supports network, USB, and LPT devices.
- Kyocera Classic Universaldriver supports Kyocera devices only and doesn't support other manufactures' devices. And also there are some Kyocera models that are not supported by the driver, like GPI models.
- Kyocera Classic Universaldriver supports PCL 5e/5c, PCL 6/XL, and KPDL.
- Kyocera Classic Universaldriver supports 'Auto configure' for finisher options, RAM / HDD option, and Color option via network.
